

Payment Processing, Inc. Forms Strategic Partnership in Construction Industry with Management Information Control Systems

*Secure, integrated credit card processing establishes complete payments solution
for Builder Information System software*

Newark, CA – December 7, 2010 -- Payment Processing Inc. (PPI), the industry leader in integrated payments, today announced a partnership with Management Information Control Systems, Inc. (MICS). The alliance, through which the PPI PayMover payment platform has been integrated with Release 1141 of MICS' Builder Information System (BIS[®]) construction accounting software, establishes a key foothold for PPI in construction accounting technology.

With numerous editions, modules, and report variations, BIS provides a scalable, versatile construction accounting solution for companies of all sizes. The feature-rich program supports critical functions such as AIA billing, certified payroll reporting and real-time job costing.

PPI PayMover is a revolutionary, all-inclusive payment platform that can be integrated with virtually any business application. It streamlines software development time by enabling software developers to offer secure, PCI compliant payment processing solutions.

PPI President Eddie Myers commented, "Our entry into the construction industry with MICS is another example of how PPI's technology is highly flexible, appropriate for any number of markets, and highly specific to the particular needs of our application developer partners."

"We at MICS are continuing to provide the construction industry with state-of-the-art solutions," added Cesar Bosio, CEO of MICS. "PPI's credit card integration represents a leap forward in processing payments in real time."

PPI's comprehensive solutions are developed and supported in house, resulting in a unique 360-degree view of the entire payment transaction. Each solution includes the critical components that define successful integrated payment processing:

- Free, feature-rich, fast and dependable technology
- Seamless, secure transaction processing
- Free developer kit and integration/certification services
- PA-DSS/PCI-DSS validation services for developers and customers
- Dedicated account managers for developers and resellers
- Aggressive revenue sharing and marketing programs
- Free, unlimited, 24/7/365 technical support from experts familiar with the solution

About Management Information Control Systems, Inc.

Since 1983, MICS has been producing construction-specific accounting software. Our Builder Information System application is available as BIS Standard, BIS Professional and BIS Enterprise. With a full range of products, BIS can meet the needs of just about every contractor. The BIS design team is committed to producing innovative, technologically advanced and easy-to-use products that meet the needs of contractors today and in the future.
