

Payment Processing, Inc. Provides Superior Integrated Payment Processing for Latest Dinerware Release

*Independent restaurants and restaurant chains benefit from
expanded electronic payments functionality*

Newark, CA – March 25, 2009 -- Payment Processing, Inc. (PPI), the industry leader for integrated payment solutions, today announced the integration of the PPI PayMover gateway with Dinerware, Inc., a leading developer of intuitive touchscreen point-of-sale systems for independent restaurants and chains.

Dinerware's new version 2.8.2 release provides a new generation of security features, localization and third-party application hooks. The application offers restaurateurs the ability to gain a deeper understanding of their operations' health, and to extend the Dinerware platform as their businesses grow.

PPI PayMover is a revolutionary all-inclusive payment platform that can be integrated with virtually any business application. PPI PayMover streamlines software development time while delivering a flexible, cost-effective and scalable solution.

"PPI and Dinerware both have market-leading solutions that are critical to the success of their customers' businesses," said Chuck Riegel, executive vice president, software products and partnerships at PPI. "PPI has a history of partnering with top-tier enterprises such as Dinerware to offer must-have products for the marketplace."

"Dinerware is excited about the 2.8.2 release because these new tools, along with enhanced core capabilities, are what customers need, particularly in these economically challenging times," said Jeff Riley, Dinerware CEO. "Integrated credit card processing from PPI is a key feature that rounds out the offering for our customers."

PPI's comprehensive solutions are developed and supported in-house, resulting in a unique 360-degree view of the entire payment transaction. Each solution includes the critical components defining successful integrated payment processing:

- Free, feature-rich, fast and dependable technology
- Seamless, secure transaction processing
- Free developer kit and integration/certification services
- PA DSS/PCI-DSS validation services for developers and customers
- Dedicated account managers for developers and resellers
- Aggressive revenue sharing and marketing programs
- Free, unlimited 24/7/365 technical support from experts familiar with the solution

About Dinerware Incorporated

Headquartered in Seattle, Washington and sold throughout the world, Dinerware provides easy-to-use restaurant point-of-sale systems for the hospitality industry. Dinerware touch screen POS systems are currently installed in fine dining and upscale restaurants, cafes, nightclubs, bar and grills, fast casual restaurants, counter service establishments, quick serve restaurants, hotels, casinos, and wineries.
