Integrated Credit Card Processing Enters Home Improvement Market

Payment Processing, Inc.'s PPI PayMover gateway enables CBC Computer Systems to provide decorating retailers with superior credit card payment services

Newark, CA -- March 27, 2008 -- Payment Processing, Inc. (PPI), the industry leader for integrated payment solutions, today announced a partnership with CBC Computer Systems, a provider of retail management software for businesses selling paint, wallpaper, windows and flooring products. The PPI PayMover platform is integrated with CBC's Decor EXPRESS™ software to enable merchants to process credit and debit card payments quickly and cost effectively.

“CBC chose to partner with PPI since they have the expertise required to implement and support a robust, integrated payment processing service,” said Ward Partridge, vice president of marketing and CFO of CBC Computer Systems. “The ability for our customers to accept credit and debit payments is in extremely high demand and CBC looks forward to providing this much-needed service.”

PPI's comprehensive solution gives a 360-degree view of the entire payment transaction by including all of the critical products and services that define a successful integrated payment solution:

- Feature-rich, fast and dependable PPI PayMover gateway with transaction processing that is seamless, secure and reliable
- Unlimited 24/7/365 technical and administrative support for all transaction processing issues
- Better-than-Bank merchant account services.

“As with other retail sectors, companies in the home improvement market now require integrated payment processing systems to manage the wide variety of both payment types and multiple locations,” said Chuck Riegel, executive vice president of software products and partnerships at PPI. “PPI is delighted to partner with CBC, adding the home improvement sector to its sizeable list of retail industries already served.”

About CBC Computer Systems

CBC was founded over 20 years ago as a single-source supplier of accounting computer systems. As the software industry developed, CBC began specializing in materials management systems for hardware and building material stores. After the sale to several paint and wallpaper stores, CBC realized that the paint and decorating market required specialized point-of-sale, inventory

and order features that were not properly handled in general purpose POS software. CBC began the development of the Decor 2001™ program, to address the special needs of decorating retailers in an economically priced, “Off-the-Shelf” style Windows application. Over the next 15 years, the Decor EXPRESS™ Retail Management System evolved and is now the leading choice of paint, wallpaper and decorating retail stores across North America. By working closely with decorating retailers, paint manufacturers and industry organizations, CBC has produced the most comprehensive and user-friendly POS Solution in the decorating retail industry.

About Payment Processing, Inc.

Since 1995, PPI has led the industry in providing software developers with a full range of services for developing and promoting integrated payment solutions, including PPI developed payment gateway technology, integration support, merchant support, marketing assistance and PADSS/PCI security services. Today, PPI is the most successful company in the world focused on integrated payment solutions, supporting over 1,000 partners and more than 26,000 merchants with efficient, cost-effective payment solutions. In 2007, PPI processed in excess of \$4.1 billion in Visa® and MasterCard® payments. For more information, visit www.paypros.com.
